

# DOVER DRIVE TRUNK SEWER RELIEF

## Construction Notification

Nighttime/early morning work to take place at Dover Dr. and PCH  
September 2013 – November 2013

### CURRENT CONSTRUCTION Dover Dr. road closure from Mariners Dr. to Irvine Ave.

Road Opening:

Before Labor Day

Occasional short term work may occur following Dover Dr. opening. Construction signs will notify drivers, pedestrians and bicyclists of temporary traffic re-routing or sidewalk closures.

### UPCOMING CONSTRUCTION: Dover Dr. from PCH to Cliff Dr.

Anticipated Start:

Immediately following Dover Dr. & PCH construction. More information will be provided in a future notification.

### UPCOMING CONSTRUCTION: Dover Dr. & PCH

#### Nighttime & Early Morning Construction

Anticipated Start:

Sept. 3, 2013\*

In order to minimize impacts, construction will occur between 9 p.m. and 6 a.m.

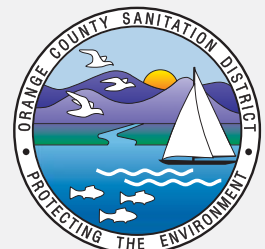

**Sun. – Thurs.**

Partial road closures will occur during construction hours. One lane of PCH will remain open at all times. All lanes will be open during non-construction hours.

\*\*\*Please be advised these dates and times are subject to change due to unforeseen operational factors or inclement weather.\*\*\*

Please visit [www.ocsewers.com](http://www.ocsewers.com) for the most current information.

Your safety and that of our work crews is important. Please assist in our safety efforts by obeying all construction signs and staying away from construction zones.

# DOVER DRIVE TRUNK SEWER RELIEF

## Background

The Orange County Sanitation District (OCSD) is a public agency that provides wastewater collection, treatment and disposal services for approximately 2.5 million people in central and northwest Orange County. We operate two facilities—Reclamation Plant No. 1 in Fountain Valley and Treatment Plant No. 2 in Huntington Beach—and treat an average of 210 million gallons of wastewater each day.

## What is this project?

Approximately 7,200 feet of 24-inch diameter sewer line will be installed to replace the existing 15-inch to 18-inch diameter sewer pipeline of the Dover Drive trunk sewer. In addition, this project also replaces 2,400 feet of a City of Newport Beach waterline.

## Where is the work taking place?

Construction is taking place along **Dover Drive between Irvine Avenue and Pacific Coast Highway** in the cities of Costa Mesa and Newport Beach.

## Why is the project needed?

The current sewer pipeline was constructed in 1952. It is not large enough to handle the projected wastewater flows and needs to be rehabilitated.

## When is the project scheduled?

Construction began July 2013 and will last approximately 15 months. Work will take place Monday through Friday. Hours will vary based on location with occasional Saturday and

evening work hours, if required. Notifications will be distributed and posted on our website with specific locations and schedule as the dates approach.

## What impacts can be expected?

OCSD is working diligently on this project to ensure every possible measure is taken to minimize public impacts.

Dust and noise control measures will be in place; however, you may still notice some dust and noise depending on the various work activities and the equipment used. Traffic impacts may cause delays. There will be lane closures and night work hours for portions of this project to accelerate the construction schedule. Any business and residential areas near the impacted work will be notified in advance.

## Will there be any construction at night?

Night and early morning work Sunday through Thursday between the hours of 9 p.m. and 6 a.m. is scheduled to take place at the intersection of PCH and Dover from approximately September 3, 2013 until early November 2013. The night and early morning work is necessary for traffic control and safety on PCH and is expected to reduce the duration of the construction project.

This work will require lights and heavy equipment. Please be assured that OCSD and the contractor are taking a proactive approach to mitigating noise as much as possible while still conducting the necessary work. We are working closely with the City of Newport Beach and have notified them of our schedule.

For more information about this important project you can visit the web site at [www.ocsewers.com](http://www.ocsewers.com). You may also contact our designated community liaison through the Newport Beach Program construction hotline at **(714) 679-2088** or via e-mail at [constructionhotline@ocsd.com](mailto:constructionhotline@ocsd.com).

The Newport Beach Program consists of five construction projects that will take place in the City of Newport Beach for the next several years. The Dover Drive Trunk Sewer Relief is the first of five projects. For more information please visit [www.ocsewers.com/NBProgram](http://www.ocsewers.com/NBProgram).

**We're here for you.**
